

The Heavy Duty Penetrator with Rust Breaker formula is designed to rapidly cut through rust and corrosion, seized parts or tools and loosen off stuck, jammed, or quarantined material. Ideal for tough conditions including wet and cold. Loosens rust from metal surfaces and frees stuck or frozen parts

Spray liberally on metal surfaces and allow standing time to ensure adequate penetration. Contains 10% Boundary Lubricant to facilitate ease of movement even with metal-to-metal contact.

InfinityPen: A penetrating fluid designed to release sized applications such as rusty nuts and bolts.

PART #	3505-425-12 (425g Aerosol)	3505-4-4 (4L x4)
	3505-52-12 (52g Aerosol)	3505-20-10 (20L Pail) 3505-205-1 (205L Drum)

DESIGNED FOR PERFORMANCE

- Heavy duty performance.
- Specifically design for rapid, deep penetration of rusted or seized parts.
- Cuts through the most stubborn corrosion with ease.
- Excellent in wet conditions and is water soluble.
- Reduces sheer strength of rust particles at metal interface, minimizing the amount of force needed.
- Contains no ozone depleting ingredients and is easily mist able.
- Reduces rust formation and displaces water.
- Unique Bag on Valve Air Pressured Aerosol.

TYPICAL PROPERTIES	ASTM METHOD	Needle Oiler
Appearance		Clear, Light, Amber
Colour	D 1500	1.6
Flash Point	D 92	108°C
Pour Point	D 97	-21°C
Fire Point	D 92	110°C
Viscosity @40°C (cSt)	D 445	3.8
Specific Gravity	D 445	0.825
Density @ 20°C	D 941	0.825 g/mL
