

AwSUM Outcomes is OPEN for business, amidst this COVIN-19 situation; we commenced operations in 2018 with a model that embraced proven technology that supports remote computing (Microsoft teams/cloud/VPN access) and are fortunate to have a diversification of high quality manufacturing locations across the country and in the US. We have inventory strategically placed in Ontario, Manitoba, Alberta, BC, and the USA. This includes a growing network of stocking distributors. We are proud we can continue help ensure farmers and industry keep operating. Now more than ever it is imperative to maintain equipment, preserve its longevity, enhance performance and save costs.

As the COVID-19 situation continues to evolve, our top priority during these challenging times continues to be health & safety. For example, at our Calgary facility, our shipments are handled with that in mind and we will, temporarily, only accept transport companies and distributor logistics personnel at our Calgary facility with a strict 2m (6 foot) personal distance buffer. No external person-to-person meetings are taking place and all internal meetings are held on-line or at a 1.5 M distance, however all staff continue to be available to service your needs. We will continue to modify our procedures in compliance with recommendations from the Public Health Agency of Canada and local authorities

Awsum will continue to receive your orders all our Power Up/PowerSUM, EnviroSUM/Triumph, Marinus and Aeriol lubricating products.

via email at orderdesk@wvi.global
